A custom mount must be installed on the mower in order to adapt the mower to a particular excavator. There are many variations of pin grabber or quick attach connections for excavators and backhoes. To insure that the mount US Mower manufactures for you fits, we require the dimensions shown on this specification sheet. Make sure all filled in dimensions are accurate, we rely on these measurements. We build the mount according to the dimensions you provide. If the drawing is not similar to the mount needed, a separate dimensional drawing should be made. (NOTE : subsequent modifications to the adapter after completion will be an additional cost.) If you have any Questions please call US Mower @ 1-877-757-7555 or Email to : [info@usmower.com](mailto:info@usmower.com)
